LOVEWITHOUTREASON.ORG

*Dear Friends*

December is a wonderful time to look back and reflect. On December 11th, Love Without Reason will celebrate our 16th birthday! Love Without Reason was born with the dreams of combating sex trafficking and providing free craniofacial surgery. We could not imagine that cleft and craniofacial camps would be held in different continents. Or that women and children would be rescued from slavery and given education and opportunities for advancement. Or that digging water wells would bring not only life, but also generate an income for hosting families. Could leadership seminars build confidence, train on the signs of human trafficking, and bring the Truth with Hope?

Though we could not imagine it, the impossible is happening. The journey of Love Without Reason has been incredible. It would not be possible without the support of our donors and all our PHILIPians who give every month. Because of your generous giving, we brought the **Joy of A Smile** to children on three different continents.

Your gift does not just impact the student, the patient, or the survivor of human trafficking. Your gift gives life to the entire family, which reaches the entire community and in turn impacts our world. Join our PHILIPians today and give your monthly gift of \$50 or \$100 to continue the impact of life.

*With love and joy*

*Santhosh and Susan Mathews*

Founders of Love Without Reason

- In the USA, we shared the link between craniofacial defects and human trafficking to parents and children and volunteers during the annual People, Not Products and 5K Run4Love events.
- In India, we held our final cleft camp of 2023 in Assam, India providing 52 surgeries. We celebrated the minors and women rescued from the red-light areas. Over 900 Set Free Pads were freely distributed here. We built 5 water wells sustaining over 600 families in North India.
- In Africa, Santhosh was invited to Malawi to introduce Love Without Reason and assess the need for cleft surgeries. Medical camps were held in Zimbabwe and in Kenya transforming the lives of children and adults.

Chairman of Love Without Reason Foundation India, Mr. Vijay Ramamoorthy (second from right) and the former chair, Mr. George P.V. (extreme right) meet in Assam, India to celebrate Love Without Reason during the final camp of 2023. Mr. George has served as chairman since the start of the Love Without Reason Foundation. He says that his prayers were answered when Vijay came on board as Chairman, and he is looking forward to Vijay leading LWR to greater heights.

# Set Free

Reusable Sanitary Pads

As we entered the Project Butterfly Center, we could hear the whirring of the sewing machines. Our staff were showing the new trainees the way to stitch the Set Free Pads, reusable sanitary pads designed by our own Sameena Kauser.

She designed this because of her understanding that disposable pads are not available in the slums. Plus, in rural areas, it is common for the women to use leaves, old rags or similar items during their periods. Because of this lack of resources, the family's health, economic status and financial stability is impacted.

Since the pandemic, Set Free Pads have been distributed free of cost to the ladies in the red-light districts of Mumbai. Nine hundred pads have been distributed in these areas. Over six thousand women have been reached.

**PROJECT BUTTERFLY** 

Harriet Beecher Stowe wrote, "A woman's health is her capital." The health of a woman has a rippling effect to the surrounding family. If she is not able to work due to her period, that is a loss of income. If her daughter is unable to go to school because of her period, that is loss of school days ultimately leading to a loss of income.

Set Free Pads can truly be a tool for transforming the health of women. The survivors of human trafficking who work at the Project Butterfly center are ready to impact the lives of women around the world with their stitching and distribution process.

Your gift in bringing this innovative solution to women is needed right now. Love Without Reason is expanding and improving the Project Butterfly center. With your generous gift today, we can build a new manufacturing facility to help sustain this endeavor.
